

Proposed CR520 Center Island

between Swimming River Rd & Hurleys Lane (Drawn to scale)

- Length: 25 ft long center lane island with extension (brick curbing) to define left turn lane.
- Pedestrian section bordered by fence & offset dual-signalized (pedestrian-activated) crosswalks
- Planted with tree, small plants and grass
- Center island left turn lane is 4 car lengths long and defines left turn into Dunkin Donuts lot, prohibits lefts into Pharmacy lot (Pharmacy traffic enters through Acme entrance.)
- East end has room for one car to pause in center while making a left out of Dunkin Donuts.
- Island discourages using the center lane as a passing lane for speeders and calms traffic.
- Sw. River Rd left turn lane is 9 car lengths long to stripes & 16 car lengths to center island.

Note: Acme access road would become 2-way with left turns into and out of from Middletown-Lincroft Rd. Connections to Luigi's & Bank of America would be made from the Acme access road & speed bumps throughout.
